

Blepharoplasty

The eyes are the windows of the soul
—Leonardo da Vinci

L
eonardo da Vinci said that the eyes are the windows to your soul. The eyes express joy and happiness but your eyelids may droop and make you look tired. Eyelid surgery (blepharoplasty) can correct drooping upper eyelids and bags below your eyes, both of which make you look older than you feel. Dr. John Cooksey has performed this surgery for over 25 years. This outpatient procedure is done under a local anesthetic and it can restore a youthful appearance to your eyes.
